EXPERIENCE IN PROJECT COLLABORATIONS

Vectorshades, Kochi — *Company management project*

MARCH 2023 - NOVEMBER 2023

It was a company management project of a steel company which includes the features like handling employees, handling projects, assigning projects and tasks to employees, punch ins, chat, and many more.

Csv Anywhere — *A service to handle .csv*

NOVEMBER 2023 - Currently working

It was a project to create a csv report of any data to analyze. It provides an Api to users so that they can insert, delete or update data to csv. It also generates reports from the mongoDb model. The project is still running and started in 2023 on november

EDUCATION

Government engineering college , Wayanad — *Btech*

Computer science engineering

AUGUST 2023 - Currently studying

PROJECTS

Notify — *The mobile SMS service*

This service helps developers to use their android phone to send SMS like OTP, promotional, etc. users can create an account in this website and add their android phones to it. When they call the service api to send sms, the service will randomly select an added mobile phone (depending on traffic) and send sms for requested payload.
